

First in the Field

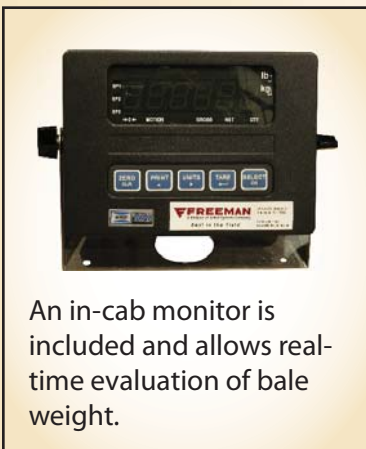

For years, Freeman has built the best hay baling equipment available. Rugged construction and dependable operation have made Freeman balers the "best in the field".

Freeman Bale Scale

Now, Freeman becomes the "first in the field" with an OEM designed and constructed **bale scale**, built to the same exacting standards as Freeman balers. Easily mounted to any new or existing 3-tie side-feed Freeman baler, the new **bale scale** allows the operator to monitor bale weight in real time, from the cab, with a level of precision never before possible.

Order field conversion kit P/N 905895

An in-cab monitor is included and allows real-time evaluation of bale weight.

- More Uniform Bales
- Improved Efficiency
- Reduced Cycle Times
- Increased Profits
