

FREEMAN Hay Baler Knotter Rebuild Kits: Great Value, Great Convenience

Last year, Allied Systems Company introduced a series of knotter rebuild kits for designated FREEMAN hay balers. With peak baling season just around the corner, it's the perfect time to consider the many benefits of these rebuild kits:

- **Highly convenient** – Receive ALL the parts you need by ordering ONE PART NUMBER.
- **Save labor & time** – Avoid a second teardown. Kits include all the parts you need to perform a COMPLETE rebuild.
- **Lower cost** – Kits are priced less than the separate pieces.

Complete knotter rebuild kits are available for the following FREEMAN Baler models:

Model: 200, 270, 280, 330, 370, 380 & 1390 in-line baler – Rebuilds knotter part no. KNT006006A

Model: 1590 & 1592 Big Balers – Rebuilds knotter part no. KNT0600600

Select from the following list to find the right kit for your application:

| Application | Rebuild Kit |
|---|-------------|
| One knotter rebuild kit for the KNT006006A knotter | 900182 |
| Two knotter rebuild kits for the KNT006006A knotter | 900184 |
| Three knotter rebuild kits for the KNT006006A knotter | 900183 |
| One knotter rebuild kit for KNT0600600 | 900180 |
| Six knotter rebuild kits for KNT0600600 | 900181 |
