PARTS MARKETING BULLETIN

DATE: November 17, 2004

BULLETIN NO. _____ PMB0201A

PAGE: 1 of 3

MODEL(S): All Wagner Machines

SECTION: 5-2 (Hydraulic System)

ATTENTION: PARTS AND SERVICE MANAGERS

SUBJECT: NEW GT-SERIES PUMPS TO REPLACE OLD MODELS

Allied Systems Company is announcing an aggressive new marketing program designed to recapture the lost pump sales associated with the previous implementation of the "Q-series" pumps. Effective immediately, ASC will no longer support the old model pump products, and we strongly encourage all WAGNER dealers to take advantage of this new sales program.

Some of the benefits include:

- Eliminates the need to support multiple pump manufacturers
- Implementation of a cost-effective rebuild program with increased warranty period for dealer-installed pumps (new & rebuilt)
- Eliminates old cores in the field (factory original and aftermarket)
- Improved quality and availability
- Competitive pricing

Please use the table on page 2 to determine the correct GT-Series pump replacement.

Note: Virtually all of the GT-Series pumps are totally interchangeable with the old model pumps. Some plumbing changes may be required, and all plumbing changes will be the dealer/customer's responsibility.

Due to clearance problems, some applications may also require the use of studs (ASC P/N 245757) and nuts (ASC P/N 234921) instead of capscrews to mount the pump. Studs require loc-tite. Lockwashers should not be used.

For more details regarding this new Parts Marketing program, please contact the Allied Systems Company Service Parts Department.

SF = Split Flange, O/R = Straight Thread O-Ring
