

# **IMPORTANT**

**NOTE: THE DELIVERY REPORT MUST BE COMPLETED BY THE DEALER AT THE TIME OF DELIVERY TO THE ORIGINAL OWNER TO VALIDATE THE WARRANTY.**

## Delivery Report Requirements:

Before a warranty claim will be accepted for processing, a delivery report (Form 80-40B) for the unit involved must be on file. The information contained in the delivery report is necessary for warranty claims processing. As of January 1, 1996, any warranty claim received by Allied Systems Company that indicates a machine has been delivered and we do not have the above completed form on file, will be returned to the dealer as not accepted.

The initial use of a machine will determine the effective date of warranty. Therefore, a delivery report is required under the following conditions:

1. When the unit is delivered and sold to a customer.
2. When the unit is delivered to a customer on lease agreement.
3. When the unit is delivered to a customer on rental.
4. When the unit is first used as a demonstrator by the dealer.

If the unit was a demonstrator, rental, or a lease machine, and is later sold to a customer, an additional delivery report should be submitted indicating the unit has been sold.
