**Customized solutions
for your steel handling
requirements.**

Shown: Model SW100F
Steelworker with 100,000 lb
capacity electromagnet.

Leaders in engineering and
manufacturing of specialized
heavy lift and handling equipment.

Allied Form #85-556
Rev 09/2009

Allied built Wagner machines - designed to move your heaviest loads.

Steelworker

Capacity: 80,000 or 100,000 lbs Rated Electromagnet

Hydraulic Hoist, Tilt, Swing, Extend Functions

Optional Autolube System

Independent Electromagnet Power Unit

Caterpillar or Cummins Engine Available

In-Cab Monitors Provide Unparalleled Visibility of Work Site via Outside Cameras

"Tricycle" Design Provides Tight Turning Radius

Battery Disconnect Switch Standard

Dual Caliper Hydraulically Applied Disc Brakes

Long Lasting Allied-Built Hydraulic Cylinders

Heavy Lift Transporter

Capacity: 185 to 280 tons

Hydraulic Elevating Bed

Conventional Mechanical Drivetrain

Customized Carriers for Coils or Slabs

Caterpillar or Cummins Engine Available

In-Cab Monitors Provide Unparalleled Visibility of Work Site via Outside Cameras

Battery Disconnect Switch Standard

Dual Caliper Hydraulically Applied Disc Brakes

Steering Linkage at Each Axle Provides Tight Turning Radius

Coil Handler

Capacity: 80 tons

Hydraulic Hoist and Tilt

Caterpillar or Cummins Engine Available

45° Articulation Each Way

7° Oscillation Each Way

Dana Series 6000 Transmission,
Dana Series 8000 Torque Converter

Rear Brakes: Wet Disc Front Brakes: Dry Disc

Joystick Steering Available

Fire Suppression System

Allied built Long Reach lift truck attachments - designed for your specific application.

Furnace Charger

Capacity: 1,000 - 8,000 lbs
(Higher Capacities Available)

Capacity Ratings at Extended Load Centers

360° Continuous Rotation

Custom Designed to Meet Specific Applications

Mounting Designs to Fit Any Lift Truck: Hook-Type, Pin Mount, or Integral to Mast

Custom Bucket/Hopper Designs to Meet Specific Needs or Designs to Accept Existing Containers

Designed for High Temperature Applications

Design Based on Industry-Proven CRD Series Rotators

Billet Handler

Capacity: 6,000 - 12,500 lbs
(Higher Capacities Available)

Capacity Ratings at Extended Load Centers

360° Continuous Rotation

Custom Designed to Meet Specific Applications

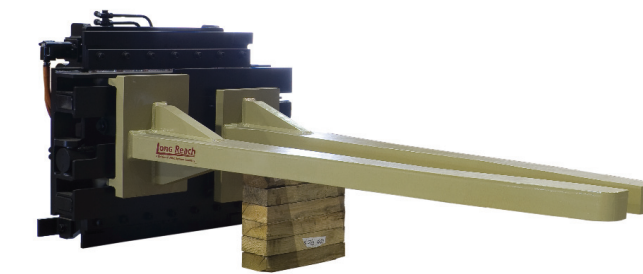

Mounting Designs to Fit Any Lift Truck: Hook-Type, Pin Mount, or Integral to Mast

Design Based on Industry-Proven CRD Series Rotators

Designed for High Temperature Applications

Non-Rotating Models Available

Pin or Manipulator Style Arms Available

SQ Series Forging Clamp

Capacity: 1,000 - 75,000 lbs
(Higher Capacities Available)

Hydraulic Clamping, Sideshifting, and 360° Rotation

Handles Molten Billets / Materials In and Out of Furnace

Non-Rotating Models Available

Mounting Designs to Fit Any Lift Truck: Hook-Type, Pin Mount, or Integral to Mast

Shock Absorbing Accumulator Protects Hydraulic System

Designed for High Temperature Applications

Wide Range of Optional Features

Minimum Lost Load Center
