

Install Allied Winches on Case Dozers Prior to Arrival at Your Store

Allied works closely with Case Construction to bring you a new winch installation option. As an authorized Case dealer, you may now order Allied winches to be installed on Case dozers prior to their arrival at your store. Here is how it works:

1. Order your dozer from Case Construction.
2. Order the appropriate Allied winch directly from Allied, as follows:
 - Allied H4A winch for Case 650L, 750-850M
 - Allied H5C winch for Case 1150M, 1650M
 - Allied H6H winch for Case 1650M, 2050M
 - Allied H8L winch for Case 2050M
3. Advise us of the dozer expected delivery time and tracking number. This will allow for the winch to be delivered to and installed at Burlington Installation Company (BIC) located in Burlington, IA. Delivery of the winch will be matched to delivery date of your dozer to BIC.
4. Wire rope ordered from Allied Systems Company will be installed at BIC at no additional cost to you.
5. Allied will bill the installation cost on your winch invoice. In many cases, it could be lower than your current installation cost.

Item Number 2316774 includes winch freight to BIC, including labor to install, regardless of winch options ordered.....\$1,900

Your dozer will arrive at your site with the winch already installed .

It's a worry-free alternative to installing the winch at your facility.
