

## Stroke & Bale Counter

- More Uniform Bales
- Improved Efficiency
- More consistent high-stroke bales

Get a more accurate stroke count — and a more consistent bale — with the Freeman **stroke & bale counter**.

No more listening out the cab window and counting off the number of strokes.

Easy to install, easy to use, the stroke & bale counter has the same rugged construction and dependable operation that makes Freeman balers the “best in the field”. Available as an option on your new Freeman baler or as a retrofit.

An easy-to-read in-cab monitor takes any guesswork out of building the perfect bale.

For even more consistent bales, add the Freeman Bale Scale (ASC part number 906635) to your baler.

Contact your local Freeman dealer or Allied Systems Company today for details.
