
ALLISON TRANSMISSION

PART NUMBER CROSS REFERENCE

The attached list is designed to afford easy access to Allison Transmission part numbers as they are used in conjunction with WAGNER part numbers.

To use the Allison Transmission Parts Catalog, you must first know the seven digit part number as well as the 10 digit serial number.

These two numbers appear in three different locations:

1. You can find the Allison P/N and S/N on the transmission nameplate, which is attached to the left side of the transmission housing.
2. You can also find the Allison P/N and S/N on the Vehicle Identification Plate, which is attached to the left side of the operator's cab/cowl.
3. Or, you can use the attached list. First, find the WAGNER part number (for the transmission) which appears on the parts book index (master check sheet) along with the transmission serial number, then "match" it to the corresponding Allison part number.

All orders for Allison transmission parts must be directed to your Allison dealer - do not send them to Detroit Diesel Allison or Allied Systems Company. Always include the Transmission Model No., the Transmission Assembly Part No. (P/N or A/N) and the Transmission Serial No. when ordering parts. Be sure to include individual part names and part numbers from the DDA parts catalog.

When ordering Parts and Service Catalogs from either Allied Systems Co. or your Allison dealer, always give the Allison Transmission Model and Part Number.
