

Brake Pump Kit (583103)

General

This kit (583103) is designed to replace either pump 239790 or 248990 when mounted on the rear of pumps 245520, 245617, or 251716. Pumps 239790 and 248990 each have 5/8" diameter shafts, while the pump in this kit has a 7/8" diameter shaft. To install this pump, remove the existing pump 239790 or 248990 and existing coupler and snap ring. Install this

pump using the coupler and snap ring included in this kit.

Items 4 & 5 are only used when replacing pump 239790, which has 1/2" O-Ring pressure and 3/4" O-Ring suction porting. When replacing pump 248990, these fittings are not required and may be discarded.

Item	Part #	Description
1	253482	Pump
2	253483	Coupler
3	253484	Snap Ring
4	29183	Fitting
5	218181	Fitting
