

Gen II eControls System & Bluetooth Diagnostics Adapter

Upgrade Your Winch Today!

The W6G, W8L, and W12E winches are built on decades of proven design. The new Gen II eControls Conversion Kit and Bluetooth Diagnostics Adapter offer must-have upgrades to your winch performance through improved safety, load control, installation, and diagnostics.

This Kit Includes:

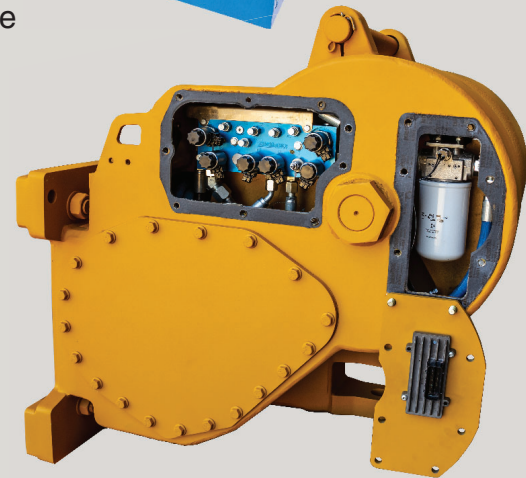

The New “Blue” Manifold

- Improved electronic control over hydraulic system to eliminate rollback and bring load to a stop as fast as possible in an emergency
- Larger fluid paths for better cooling and more responsive clutch control
- Kit is backwards compatible with almost all existing W6G, W8L, and W12E winches with eControls

A New Electronic Controller

- Robust Design
- Now located inside of the filter cover for easy access
- Improved diagnostics with optional Bluetooth Diagnostics Adapter

A Newly Designed Joystick

- Winch light displays error codes, including change oil filter and electrical faults
- Inching performance that rivals a hydraulic winch
- Ergonomic design

Bluetooth Diagnostics Adapter (optional)

- Conveniently allows user to see live winch diagnostics data on an iOS or Android device

All hardware, wire harnesses, and gaskets are included for a complete, clean installation.

Gen II eControls System & Bluetooth Diagnostics Adapter

Gen II eControls Conversion Kit Guide

Winch Model	Options	Winch Generation	Part Number
W6GE	With Freespool	Red/Silver Manifold	2317680
