

## The Freeman Bale Scale is Chosen as a 2013 World Ag Expo Top 10 Product!

Allied Systems is proud to announce that the Freeman Bale Scale was recently recognized as a "Top 10 New Product" by the World Ag Expo and will be on exhibit February 12-14, 2013, in Tulare, California. The World Ag Expo is a showcase that highlights innovative farm equipment, chemicals and technology and draws over 100,000 visitors every year.

The bale scale allows the hay-baler operator to monitor the weight of their bales while in the field, from within their cab. It fits easily onto the chute of all Freeman three-tie side feed balers and can also be modified to fit other brands of balers, including two-tie models.

*Cab Mounted Digital Bale Scale Display*

The scale comes with an in-cab monitor that allows the operator to monitor bale weights in real time, leading to more uniform bales, reduced cycle time, increased efficiency and ultimately higher profits.
